Gen. Harrison Wedded Last Evening to Mrs. Dimmick.

A VERY UNPRETENTIOUS CEREMONY

Only Thirty-six Witnesses-The Groom's Gift to the Bride-Not Many Carlosity Seekers at the Church Door-The Bridal Gown.

New York, April 7.—Perhaps as simple a wedding as has been witnessed within the sacred walls of St. Thomas' church was solemnized half an hour before 6 o'clock last evening. when Gen. Harrison, twenty-third president of the United States, entered into the holy bonds of wedlock with Mrs. Mary Scott Lord Dimmick. Not one of the thirty-six favored witnesses of the ceremony could fail to have been impressed with its singular unpretentiousness. Both the brite and groom declared that this was a private affair of their own, and they set about and conducted it as best belitting their itastes. The assembled crowd outside the church showed the interest the public had in the affair. Secreey as to the exact hour of the ceremony had been carefully maintained, which, in a measure, served to check the growth of the curious. Then, too, the weather was not inviting enough, even to the curious, to attract as great a mass as was feared.

The Church Decorations.

The chancel of St. Thomas' church was handsomely decorated with flowers. The decorations consisted chieny of white lilacs, Easter lilies and evel greens. On either side of the chancel were umbrella-shaped banks composed of white lilies. Behind each of these floral pieces was a bank of lilies. w .h a background of palms and evergreens. Near the spot where Gen. I arrison and his bride stood were two I age vases of lilacs. Lilies were Lad on the pews with broad white satin ribbons.

The Guests.

The guests began to arrive at the hurch shortly before 5 o'clock. As (they entered they were received by the two ushers. E. F. Tibbott and Daniel M. Ramsdell, Mrs. John C. Parker, the bride's sister, occupied a front pew on the left, and Mr. and Mrs. Pinchot, the one on the right. Behind Mrs. Parker sat Gov. Morton and Col. Marvin, his military private secretary. In the succeeding pews were Senator and Mrs. Stephen B. Elkins, ex-secretary of istate John W. Foster and Mrs. Foster, ex-attorney general W. I. Miller and Mrs. Miller and George W. Boyd of the Pennsylvania railroad. In pews back of Mr. and Mrs. Pinchot sat relatives and friends of the bride. They were Major and Mrs. Richard Parker, Chan-Dimmick and Mrs. Briggs, Mr. and Mrs. Leeds, Norman Leeds and the Misses Leeds, Mr. and Mrs. Broughton and Miss Lambert, Gen. and Mrs. Fitz John Porter and the Misses Por-

Arrival of the Bride and Greem. It was just 5 o'clock when Gen. Harrison and Gen. Benj. F. Tracy, his best rnau, entered a carriage at the Fifth Avenue hotel and started for the church, where they arrived at 5:20 o'clock. They entered through the rector's residence on Fifty-third street and went directly to the vestry, where they awaited the arrival of the bride. Gen. Harrison wore a long frock coat, dark trousers and white gloves. In the lapel of his coat was a buttonniere of lilies of the valley. Gen. Tracy wore a frock coat and strined trousers, and a small bouquet of white violets. At 5:05 o'clock Mrs. Dimmick and her brother-in-law, Lieut. John F. Parker, U. S. N., were driven from their residence;40 East Thirty-eighth street, and reached the church at 5:18 o'clock. They entered by the main door on Fifth avenue and went direct to the tower room to the left of the vestibule, where wraps and coats were discarded. It was 5:33 o'clock when the two large doors leading to the centre aisle were thrown aside and the ushers, side by side, stood in the passage way. At the same moment, Dr. J. Wesley Brown, the officiating clergyman, robed in a white cassock, appeared from the vestry followed by the sexton. The reverend doctor passed in behind the manctuary rail, the attendant closing the gates after him.

The Bride Thoroughly Composed.

Dr. Brown knelt in prayer a few moments, and then the ever popular strains of "Lohengrin" burst forth. and re-echoed back from the empty stalls with double volume. Then the door leading to the vestry on the left of the altar opened and the silvery locks of Generals Harrison and Tracy were seen. There was an awkward pause for a minute and the assemblage looked interestingly, first at the altar and then at the rear entrance. Finally, at 5:33 o'clock, the bride appeared and fell in behind the ushers. At the same moment the minister nodded his head. signalling the groom to step forward. Gen. Harrison and his best man at once came forward and stood upon the top chancel step. The left hand of the general was bared and be carried in his right the left hand glove. Immediately the bridal procession was begun.

The two ushers walked well forward and took a position on the second chancel step. The bride, leaning upon the arm of her brother-in-law, Lieut. Parker, with head erect and thoroughly composed, followed.

The Ceremony. As the bridal party approached the

chancel, Gen. Harrison came down the steps to the floor to receive his bride. With a frank movement, she extended her right hand which the groom clasped in his left. Then the couple marched up the step to the centre of the altar, where they knelt a moment in prayer. Gen. Tracy and Lieut. Parker followed, the former standing to the right of the groom and the lieutenant to the left of the bride. It was a pretty picture, beautiful in its simplicity. The reading of the Protestant Episcopal ceremony was at once begun. Both faced the minister and listened intently to his words. When the usual question was propounded to the groom "wilt thou have this woman to be thy wedded wife,' etc., the general responded in subdued, almost inaudible tones. When the same question was put to the bride, she answered in a clear musical voice. In response to the question: "Who giveth this woman to be married to this man?" Lient. Parker steeped forward. Taking the bride's right hand he placed it in the general's left. The minister smiled pleasantly, took Mrs. Dimmick's hand back from the general's and motioned the lieutenant to place it in his (the minister's) hand. Mr. Parker complied, and then the groom made the usual promise that "I plight thee my troth," the bride in turn making the same vow.

Wedding Procession.

As the minister uttered the words: "Those whom God hath joined to gether, let no man put asunder," bride and groom turned about and faced each other. The final words that made Gen. Harrison and Mrs. Dimmick one were pronounced at seventeen minutes to 6 o'clack. Dr. Brown shook hands with both and offered his warm congratulations. The ex-president then extended his right arm to his newly made bride and, to the soft strains of the "Tannhauser Wedding March" they filed down the aisle. They were immediately followed by the ushers. Next came Lieut Parker. As he reached the front pew to the left he gave his arm to Mrs Parker, who stood awaiting him. Gen Tracy followed, he taking Mrs. Pinchot from the first new on the right. In this order the wedding procession marched down the zisle, the guests following behind. On reaching the vestibule, the party retired to the tower room, where wraps and coats were donned.

Off for Indianapolis.

Gen. Harrison's face bore a calm. satisfied expression, but a change had taken place in his appearance. He had evidently put himself in his barber's hands during the day, and his looks vere somewhat altered. His beard had been closely trimmed on both sides and considerable cut away from the chin. It made quite a difference in the general's make-up, giving him a younger appearance. The bridal party was driven to the residence of Mrs. Pinchot, where light refreshments were served. Here the bride and groom donned their traveling attire. Soon after 7 o'clock the party reentered their carriages and were taken to the Pennsylvania railroad station in Jersey City. They boarded the private car of vice-president Frank Thomson. which was coupled to the regular 7:30 p. m. train west, and the bride and groom left at once for Indianapolis. Some of the party accompanied Mr. and Mrs. Harrison as far as Philadelphia, and participated in the wedding supper, which was served aboard the CAT.
Where They Will Spend the Honeymoon.

The honeymoon will be spent in Gen. Harrison's home in Indianapolis, which has been refitted and renovated for the occasion. Later the couple will go to the Adirondack mountains, where a cottage has been prepared for them

at First lake in the Fulton chain. The Bride's Gown.

The bride, instead of carrying a bouquet, held an ivory prayer book in her hand. Mrs. Dimmick wore a gown selected with rare good taste. The material is a novel fabric of pearl gray. The skirt is of extra long cut in the front and falls in drapings to a demitrain very much fluted. The train is daintily stiffened with satin and linen. Along the edge is a pretty design of old lace. The bodice is cut with a high neck and is profusely trimmed with old Honiton lace. This lace has been an heirloom in the Lord family for years. The costume is enlivened by a turquoise blue velvet stock and bows. The under bodice is of white chillon, over which is a Louis XVI. coat. The revers are broader than usual at the neck and shoulders. The combination made a dazzling picture. In the back the coat ends in regulation tabs. It is lined with a lighter silk. The sleeves are great petals of dress material, full at the shoulder and tapering to the forearm. They come to a sharp point at the wrists, ending in a French fall of old Honiton lace. Lace is draped over the front of the skirt and held with diamond bugs. Mrs. Dimmick's bonnet is small, of blue velvot, trimmed with white aigrette and small spangles, held in place by jew-

GARRETT'S PHENOMENAL THROW

He Hurls the Discus 29.13 Metres-More Than 40,000 Persons Witness the Games-Awarding the

Athens, April 7 .- Yesterday began the 776th Olympiad, in which athletes from several countries participated. The Americans who took part in the games were the victors in several of the events, despite the fact that they have been here a very short time and had little practice after their long ocean voyage. The weather was mild, but cloudy. Early in the morning it was feared that the games would have to be postponed because of the rain that fell Sunday, but later it was decided that the grounds within the Stadion were in sufficiently good condition to allow of the opening events taking place. More than 40,000 persons were admitted to the Stadion, including the king of Greece, the duke of Sparta, the crown prince; and other members of the royal family, the members of the diplomatic corps and many other prominent persons. These 40,000, however, were not the only ones who witnessed the games. The Stadion has no roof and on each side of it rise hills from which a good view can be had within the walls. These hills were fairly black with spectators, thousands of whom were too poor to pay the small price of admission to the Stadion, but who were determined to see the revival of the ancient Greek festival. The sight was a remarkable one, and seldom has such interest and enthusiasm been displayed over any event in the Grecian capital. The Americans who took part in the events appeared to be in excellent form, and they won their victories with much ap-

Some of the Events.

For the discus throwing the following Americans were entered: Captain Robert Garrett of Princeton university and Eilery H. Clark of Harvard, a member of the Boston Athletic association. Garrett won. The first heat of the 100 metre race was won by F. W. Lane of Princeton in 12 1-5 seconds. Szokoly, a Hungarian, was second. The second heat was won by T. P. Curtis of the Boston Athletic association, whose time was 12 1-5 seconds, the same as Lane's. M. Chalkokondylis, an Athenian, was second. The third heat was won by T. F. Burke of the Boston Athletic association in 11 4-5 seconds. Hoffman, a-German, was second. In the hop, step and jump Connelly covered 13 7-10 metres. Tufferi, a Frenchman, was second. In the first heat of the 400 metres race H. B. Jamison of Princeton was first and the German, Hoffman, second. The second heat was won by Berne, an Englishman, with Gimolin second. The first heat of the 800 metre race was won by Flack, an Austrian, Lermusiaux, a Frenchman, won the second heat. All the finals will be run on Friday.

Garrett's Phenomenai Throw. Garrett's throw was considered something phenomenal by the spectators. He threw the discus 29.13 metres, defeating the Greek champion, Paraskevopoules, by 19 centimetres. The winners in the several events were cordially applauded. Everything passed off without a hitch, and the revival of the games has been most successful.

Awarding the Olive Crowns.

The progress of the games will be better understood by remembering that 100 metres are nearly equivalent to 109 yards and 400 metres to 437 yards. The distance between Marathon and Athens is about twentyeight miles. While the complicated pentathlon, to win which was the chief glory of the Olympic games, is not revived, there will be medals for allround excellence. In order to secure the olive crown in the ancient event one was compelled to excel at once in leaping, running, javelin throwing, throwing the quoit and wrestling. The olive crowns that will be awarded to the victors will be made from material furnished from the same grove from which were taken the leaves and sprigs that formed the crowns of victory centuries ago.

THE HELLENIC GAMES | REBELS VICTORIOUS

Spaniards Suffer a Severe Defeat Near Cienfuegos.

PATRIOTS USE EXPLOSIVE BULLETS

Government Troops Lose a Large Number in Killed and Wounded-Cubans Took Them by Surprise-Court-Martials at Matanzas. Havana, April 7.—Intelligence has

reached this city that a fight has occurred among the hills around San Blas, near Cienfuegos, province of Santa Clara, between the column commanded by Col. Vasquez and a body of insurgents. The latter occupied an elevated position, which gave them a decided advantage over the Spaniards, who were taken by surprise. The troops claim that the rebels used explosive bullets. However this may be, it is known that the Spanish were defeated after a hot fight, losing many killed and wounded. Among the latter were Col. Vasquez and Lieut. Buron. At one time during the engagement the insurgents charged upon the troops with machetes, inflicting heavy losses. The official account of the fight says that the insurgents lost twenty-one killed and three wounded, while the Spanish loss was sixteen wounded. The report says that the insurgents were defeated, but, like many other of the reports issued by the government, it is utterly unreliable. The insurgents, as stated above, completely surprised the troops and utterly routed them. The newspapers here report that Gomez, with 4,000 men, is going to the Signanea valley. A court-martial held at Mantanzas has senvenced four prisoners of war to death. They are Timoteo Mesa, Jose Gonzalez, Ramon Gonzalez and Salustiano Fresnoda. Twenty-four prisoners were yesterday deported to the Isle of Pines, ten of them being convicted of political offences, while the others were ordinary criminals.

Fired on a Spanish Gunboat.

Havana, April 7.-While the gunboat Alvarado was entering the port of Marave, near Baracoa, province of Santiago de Cuba, she was fired on by rebel forces located on both shores of the bay. The gunboat replied, with what effect is not known. The firing was kept up for two hours. One sailor was seriously wounded.

THEIR PLANS UNCHANGED, Statement Issued by the Booths Before

Leaving for Chicago.

New York, April 7 -Before leaving for Chicago last evening Mr. and Mrs. Ballington Booth issued a statement, in which they say that, while they have met and held a long interview with Mrs. Booth-Tucker, they wish it distinctly understood that their attitude is absolutely unchanged, and that their future plans for God's American Volunteers, their new order, will go forward as heretofore stated. They also say that the interview, outside of the controversy, was of a sisterly and brotherly nature.

College Baseball.

Lynchburg, Va., April 7 .- The university of Virginia was defeated yesterday by the Yales in a beautiful game. For six inningsait looked like Virginia's game, but in the seventh Yale turned the tables. Score-Yale, 8; University of Virginia, 7.

Winston, N. C., April 7.-Princeton college and University of North Carolina played a six inning game of baseball here yesterday afternoon. Score-10 to 8 in favor of Princeton.

John L. O'Brien Convicted.

Newport, R. I., April 7.-John L. O'Brien, Rhode Island's fugitive from justice extradited from England, was sentenced in special session of the supreme court yesterday to eleven months' imprisonment and to pay all costs, which will amount to \$1,000. O'Brien skipped his bail but his brother had paid the amount. He was convicted of robbing Goodridge & Co.

Farmer Greacher Dead.

Ernest Freido of Brooklyn, editor of a paper said to be published by Ahlwardt, was in the party and had his jaw smashed by the crowd. Ahlwardt and Freido were arrested and locked up, together with several others. A number of detectives from headquarters appeared on the scene, having been summoned by the proprietor of the hail, and quickly dispersed the mob. Detective Quinn picked up a pistol which he says was in the hands of Ahlwardt during the scrimmage. Ahlwardt was not injured beyond a few bruises.

THE BLACK PLAGUE IN CHINA. This Government Warned To Beware of

Infection at San Francisco. Washington, April 7 .- A report received at the navy department from a surgeon on duty in China contains the information that the black plague has broken out in Hong Kong. For commercial reasons, he said, the authorities have endeavored to keep the fact a secret, but the surgeon thinks this government should be informed to guard against infection at San Francisco. The mortality has been very great, persons attacked with the disease dying in three or four days. The surgeon will remain at Hong Kong to study the plague. His report has been sent to the Marine hospital service.

CUBANS ARE ELATED

Satisfied with the Passage of the Belligerency Resolutions.

SPAIN'S DOWNFALL AN ASSURED FACT

Congressmen Laugh at the Idea of That Country Declaring War Against Us. Mr. Cleveland's Course in Doubt. Spanish Press Comments.

Washington, April 7.-The repre-

sentatives of the Cuban insurgents are highly elated over the passage yesterday in the house of the senate Cuban belligerency resolutions, especially in view of the large majority-245 to 27by which they were carried. Although they would have preferred the more radical resolutions passed by the house recently, they are still very well satisfied. They claim that if President Cleveland will act favorably upon them that the downfall of the Spanish power in Cuba is an assured fact. They say that the Cubans are sure to win their struggle, but that if the president lives up to the resolutions the end will be brought about much sooner. Almost simultaneously with the passage of the resolutions the news of the patriot victory near Cienfuegos came to add its quota to the general joy.

War Not Expected.

Notwithstanding the recent warlike utterances of the Spanish press, filled, as they were, with threats of vengeance should the United States recognize the belligerency of the Cubans, not one of the congressmen who were interviewed to-day seemed to have the least fear that the Spanish government would carry out the threats contained in the press of the country. They say that Spain knows too well the power of this country to risk a war, and that, even if she were so minded, she would be unable to raise the necessary funds in any of the capitals of Europe. Besides, she already has her hands full with the war in Cuba and can spare neither the time nor the men in a conflict with a nation as powerful as the United States. The story published in a New York newspaper that a treaty has been entered into between England and Spain to declare war against the United States should there be any more made by this country looking to the independence of Cuba is likewise laughed at by those who are in a position to know.

The President's Course in Doubt, What course the president will pur-

sue in the matter is a matter of doubt. As the resolutions are concurrent, the president may utterly ignore them. lle has done so in the case of similar resolutions anent the Armenian affair, which although passed by congress on January 20, have never, so far as known, been the subject of any diplomatic correspondence between this and the Turkish government. If the Turkish government has been officially informed nothing has come of it.

INDIGNATION IN SPAIN. The Press Contain Some Very Bellicose

Madrid, April 7 .- The newspapers here are deeply indignant over the adoption by the American congress of the resolutions recognizing the belligerency of of the Cuban insurgents and their comments are very bellicose, They support the proposal that has been made to raise a national subscription for a volunteer fleet. The Heraldo declares that few Spaniards, except Senor de Lome, the Spanish minister at Washington, believe that President Cleveland will not recognize the insurgents as belligerents. It adds that if the United States also means war with Spain the latter would prefer it

ROSECRANS HONORED.

Presented with the Lacture Medal by the University of Notre Dame.

Upon Gen. William Stark Roseerans-army leader, ex-minister to Mexico, ex-congressmen from California, and President Cleveland's first register of the treasury-has been conferred the Laetare medal, annually presented by the university of Notre Dame to the Catholic laymen judged most worthy.

It is only since 1883 the medal has been presented. The custom is an oifshoot and the American counterpart of the presentation of the golden rose by | but even fought bravely with cutlass, the pope. Every year, on the third Sunday of Lent-Lacture Sunday-the pope blesses a golden rose of great beauty and priceless workmanship and sends it to the Roman Catholic of Europe whom

CEN. WILLIAM S. ROSECRANS.

he judges most deserving of such

homor. The history of the Laetare medal though brief, is marked by many famillar names. Its first year, 1883, saw it presented to John Gilmary Shea, the historian of the American church. During the next three years it went to Patrick Kelley, the architect; Eliza Allen Starr, poet and artist, and Gen. John Newton, the engineer. In 1887 there was a break in the chain. The name of the man chosen by the trustees is not set down in any book. He was a convert to the Catholic faith, but he vowed to refuse any ecclesiastical honor offered him, and he felt that he must decline the offer. In 1888 the medal was given to P. V. Hickey, editor of the Catholic review, and during the following years to Mrs. Anna Hanson Dorsey, William J. Onahan, Daniel Dougherty, Henry F. Brownson, Patrick Donohue, Augustin Daly and Mrs. Anna T. Sadlier.

The medal conferred each year is of necessity very similar to those which have gone before, but a certain uniqueness is imparted by the efforts of the artist to epitomize the career of the one to whom it is awarded. The one presented to Gen. Rosecrans is almost severely plain. It is a massive disk of gold, with raised edges and sunken center, bearing on the obverse the usual legend: Magna Est Veritas et Praevalebit." The letters are of black enamel and precious stones. The reverse of the disk is much the same. Another inscription in black enamel letters encircles Gen. Rosecrans' name, which is engraved in the center. The medal was presented by Bishop Montgomery, of Los Angeles, in whose diocese Gen. Rosecrans resides.

A Legal Marriage Engagement. A Kansas court has ruled that "a man who calls upon a woman regularly and thices her to enterta nments occasional-In is legally engaged to marry her."

WOMEN OF THE SEA.

These flave followed a Life on the Wave from Choice.

The sailors' superstitious fear that a woman's presence on shipboard invites ill-luck has failed to deter women whose hearts yearn for the sea from gratifying this desire. The pages of the maritime history of the world contain the names of many matrons and girls in various periods who, disguised as men, have followed a life on the ocean wave. The majority of them not only proved excellent sallors, pike and pistol against the foes of their

native land. They did not even shrink from sail ing under the black flag; for the English women, Anne Bonny and Mary Read, joined the buccancers, the typical pirates of the Antilles, in order to gain booty to their hearts' content.

A German writer gives a number of names of women who have gone to sea among which the following are inter-

Jean de Belleville, to avenge her husband, who was murdered in the year 1343 in Paris, fitted out a squadron of ships and ravaged the coast of Normandy, burned castles and illumined the seat at night with the glare of blazing villages. Jean de Belleville was famed in her age as one of the most

beautiful women in Europe. Sometimes jealousy has sent a young wife to sea in sailor garb. The ballad of bold Hannah Snell is now known by all sailers. This woman was born in London in 1723, and in the course of time married a German sailor named Jacob Summs, who squandered her little property and then deserted her. To seek this faithless fellow, Hannah donned men's attire and went to sa. Her experiences during her quest would fill volumes grave and gay, tragic and comic incidents alternated. She served only on English men-of-war. took part in numerous battles and received several wounds. After many years she had the news that Jacob, in punishment for a serious crime, had been put into a sack and thrown into the sea somewhere in France. From that time she left the royal service, where her disguise had never been discovered, and returned in woman's clothes to London. The government granted her an annual pension of £50 sterling for life. She is said to have gone on the stage afterward and acquitted herself admirably in sailor

There are also high-hearted women who have performed many brave, herole deeds while sailing the seas with their husbands. Among them Louise Dittmar, the wife of the captain of the Prussian steamer Edgar, deserves the highest praise. On the way home the entire crew, except the captain and helmsman, were attacked with serious illness. The two men undertook to attend to the engine, while the woman stood at the helm and steered the ship. and this was done night and day almost without relief, for weeks! The steamer arrived in port safely, after seven of the crew had died on the passage. In this case the valuable vessel had actually been saved solely by the captain's wife, for it is difficult to estimate what the two men could have done without her aid. Captains whose ship owners forbid them to take their wives with them might aptly cite as an opposing argument of the example of Louise Dittmar.-Detroit Free Press.

WHAT SEEMS AND IS.

This Little Dialogue May Serve to Make the Stranger Less Diffident.

The palaces of America are the New York hotels. The visitor from the back district enters a New York hotel office in the same spirit that he would invade St. Peter's, in Rome. There is something in the architectural grandeur, in the richness and extravagance of form and color, in the mellow light coming from vaulted ceilings and colored glass that touches the spirit with a sense of calm. And the man behind the rosewood and onyx counter! What dignity of mien! What austerity of countenance! What Jove-like front! And the gentleman coming yonder across the mosaic floor. He may be the head of a great educational institution, or a statesman, high in the councils of the nations. He is followed by a black servant in livery, carrying his personal effects.

But, ah! Human nature is the same in the midst of all its impressiveness as it is in Princeville or Jackson's corners. The distinguished-looking gentleman seizes by the hand the dignitury on the other side of the counter and says: "Hello! old stockin', how are you? You look fit to run four miles!"

"Bully! bully! Charley, old man! Ain't seen you for a coon's age. How

are they comin' with you?" "Full-handed, never better, feelin' like a yearlin'. Wow! Ain't it cold! Got a good, hot room for me?"

"Fix you proper, my boy. Have to put you up pretty high this morning, but'll get you down on the second floor by noon. How'll that do you?"

"Have to stand it, I suppose. Can't you give me that hot room you gave me last summer? Zip! but that was a scorcher!" "Have a fire built up there now?"

"No, guess not-what's that? Number 411? Can't you add 44 to it? Pll go out and play it." "Can't do it. It's beyond the limit of

the house. Deen to breakfast?" "No; I'm hungry as a wolf." "Go right in. The bacon's on the iron. Hist! Front! Baggage to foureleven."-N. Y. Sun.

Gladness Comes

With a better understanding of the W transient maure of the many physical ills, which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge, that so many forms of sickness are not due to any actual dis-ease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs. promptly removes. That is why it is the only removes with millions of families, and is everywhere esteemed so highly by all who vame good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness without debilitating the organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine artiele, which is manufactured by the California Fig Syrup Co. only and sold by

all reputable druggists.

If in the enjoyment of good health, and the system is regular, laxatives or other remedies are then not needed. If afflicted with any actual disease, one may be commended to the most skillful ph. sicians, but it in need of a larative, one should have the best, and with the well-informed everywhere. Syrup of Figs stands highest and is most largely used and gives most general satisfaction.

A Woman's Courage.

I saw a woman do a courageous act in San Rafael yesterday. Some little children were playing ball on the street, when a big black dog ran up and sprang at a six-year-old boy. He threw up both hands and screamed. The dog sprang toward him again, but did not quite reach him. The little fellow was paralyzed with fear, and could do nothing but scream as the dog made repeated springs at him. A woman on the opposite side of the street saw that little feliow's peril, and looked around for help. Then, seizing a large stone, she ran up and hunted it at the brute. It turned tail and ran down the street | Then Congressman Linton, as spokeses fast as it could go, till it overtook the stone, picked it up, trotted back, laid it at the weman's feet, and stood vagging its tail for her to throw it egain. The dog wanted to play ball, too.—San Trancisco Post.

MARQUETTE STATUE.

A Work of Art Which Has Caused Con-

wisconsin's statue of Pere Marquette, the French explorer and Jesuit priest, stands in Statuary hall in the capitol at Washington with no definite date set for its unveiling. The ceremony was to have been performed on February 29, but was then postponed and no other day has been fixed upon. The cause of this uncertainty and delay is the opposition raised by the American Protective association and other anti-Catholic interests as expressed in the resolutions of Congress-

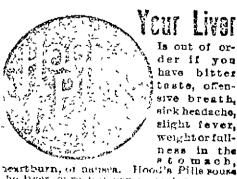

man Linton, of Michigan, introduced recently in the house of representa-

The statue is offered to the United States by Wisconsin under the law which permits each state to place a statue of one of its citizens in Statuary hall. For years Wisconsin's legislature had been trying to honor some one of its most distinguished citizens by taking advantage of this privilege and placing his statue in the national capitol, but was unable to agree upon anyone to be so honored until Father Marquette was proposed by George C. Ginty, then, in 1887, a state senator. The Catholic interests in the state at once gave the project their strongest support and raised the greater part of the \$-.000 the statue has cost. The leg slature of Wisconsin took the necessary official action and, in 1994, Gov. Peck made a contract with Trentahave to design and make the statue.

But Congressman Linton declares that the law which gives to the separate states of the union the privilege of erecting statues in Statuary hall provides that the statues shall be those of citizens of the states erecting them, who shall have performed civic or military service entitling them to distinction. Pere Marquette, he further says, was a Frenchman and not a citiz-n of Wisconsin or any other state of this union. However, the statue was accepted on behalf of the United States by a joint resolution passed in special session of the Fifty-third congress. man for the opposition, declares that the statue represents Marquette whoily in the character of a priest,, and therefore does not conform to the intent of the resolution providing for its acceptance, and that it now occupies a place in Statuary hall in violation of the law. Mr. Linton's resolution, embodying this declaration and this claim, was referred to committee and cannot be brought before the house until he is recognized by the speaker.

They "have taught lady patronesses of different societies to diagnose diseases, to dress and bandage wounds, to vaccinate their own children and those of their neighbors. Medical science is vulgarized in every way. Doctors write to important daily papers explaining how bronchitis and ramps of the stomach are to be cured. and in fashion journals they teach how to cure pumpl s and avert headaches. LATE SPRING SNOW STORMS.

Snewfalls in April Not at All Unusual Bleighing in May,

A great many people have said today that they never knew such a snow storm so late in the season, and such remarks only go to show how quickly we forget about the weather. April ancw storms are not at all un usual. Two years ago several inches of snow fell on April 16th and the weather records show that show has sometimes fallen in May. Some of our older citizens distinctly recall the spring of 1873, when snowfall succeeded snowfall in Apr.l and the first half of May. There was fairly good sleighing on May 1st, that year, and on May 12th there was nearly a foot of snow and a few sleighs were seen on the streets of Middletown...

A petition for a sewer in the black dirt, to drain that part of the city lying west of Highland and Wickham avecues, was read and was referred to the engineer, with instructions to make a survey and prepare a map. This is an old scheme and a difficult one that has puzz s1 all previous Councils and Boards of Trusfecs. Most of the property owners in this locality have already been assessed for the Fulton atreet and Monhagen avenue sewers and as ali engineers thus far have given as their opinion that a main sewer in this locality will be an expensive one ew city officials are willing to order such a sewer; yet until it is done there is no means of sewering that portion of the city.

Mr. Sinsabaugh offered a resolution that a map for a sanitary sewer on Bonnell street be prepared by the engineer.

TO LEASE ROOMS IN THE TIMES BUILD-

Mr. Bowler offered a resolution that rooms in the proposed Times building be leased at \$1 000 per year for five years from Oct. 1st, the rooms providing for all departments of the city government except the Board of Education. The resolution was adopted.

Mr. Reed offered a resolution to advertise for bids for electric arc, and gas and nap ha lamps. Adopted.

Mr. Mance presented a note from Alderman Funnell asking for fifty feet of hose for washing the carriage of Ontario flose Co. and moved that the Fire Committee purchase same. Carried.

THE VANFLEET CLAIM

Mr. Sineabaugh reported that Mr. VanFleet had refused to settle at the figures named by Osuncil, and that he had procured through Mr. Van Fleet's attorney a stav of the suit -Mrs. C. C. Noble, and son Cuttis, commenced by Mr. VanFeet until are removing from New York to 103 | the matter could be brought before Council. He moved that a settlement be made with Mr. Van Fleat for \$45, the amount claimed. He said the bill was excessive but there was some damage. The resolution was

adopted, Mr. Dirrance voting no. On muttion of Mr. Mance the Sc eet Superintendent was directed to curb and pave gutters of Prospect strest, both sides, from Highland avenue to

Watkins avenue. A resolution was passed authoriz ing the issuing of a certificate to cancel the sale of lands of A. V.

WEDDINGS IN ROME.

The Ceremonies Differ Much from Those in This Country.

There is a fixed idea in the Roman mind that the only two months of the year suitable for weddings are May and October, the former because it is not yet too hot to make the honeymoor cour unpleasant and the latter because it is not yet too cold to get up and be married at eight o'clock in the morning, for among the upper class eight o'clock is the fixed and orthodox hour. Marriage in Italy is essentially and primarily a religious ceremony, accompanied by mass and holy communion, the latter involving fasting until the ceremony is over.

Fushionable weddings are usually celebrated in the private chapel of a eardinal, bishop or monsignore, at whose house the breakfast is usually given, instead of at the bride's home. There are also various other differences, which make a curious impression on the mind of an English girl marrying a Roman Bridesmaids are unknown; instead there are four witnesses in attendance - two for the bridegroom and two for the bride; they must be men of the Catholic faith, who are able to swear that the contracting parties are free to marry. During the marriage ceremony the witnesses must stand close to the bride and bridegroom, in order to hear their ous and to feel satisfied that they are made of their own free will, compulsion being one of the two reasons tor which the church can annul a marrage. After this the witnesses retire to the background and low_mass is laid, nousie never being so much as thought of. There is a special mass in which at one point a silver tablet, called a "pax," is kissed by the priest, with the words: "Peace be with you." and then carried to the married couple, to be kissed by them in turn. After the mass there is a pause and a silence in the chapel for about a quarter of an hour, while the priest and all who have communicated make their thanksgiv-

The breakfast, according to English ideas, is a most curious morning meal, consisting of coffre, ices, cakes and sweets in great variety. When it is over boxes or bogs of "confeiti" are distributed by the bride to all the gentiemen present and by the bridegroom to all the ladies. They are also sent with the "letter_de faire part" to all internate friends not able to attend the weeding, and vary from the simplest white satin bonbon bag to the boxes made of solid silver.

When the newly married pair have said "good-by" they drive to St. Peter's to Lay the traditional visit to the tomb of the prince of the apostles. Almost any morning in May or October one may see a bride, in her wedding dress, kneeling with her husband under the reat dome of St. Peter's. The wedding party has in the meant me broken up, to reassemble, however, later at the station to complete the farewells. The presents are often displayed the exercing 1s fore at a reception given at the Leuse of the bride. All the a cents are given to her; even

reads of the bridegroom who co not I now her send him something for the bride. An audience of the pere is usually obtained a day or two previously, in order to ask his blessing on the two lives now to be pent together.-Chicago Chronicle.

THE BATTLE SHIP IOWA.

Will Be the Most Formidable Craft in Our New Navy.

Over a Thousand Tons Larger Than the 'adiana and a Knot Faster-"Tumble Home" Sides a Feature of Its Construction.

About two years and a half ago the

keel of the lowa was laid, and within another year she will be completed and ready to join the North Atlantic squadron. She is now over 1,000 tons greater displacement than the sister ships Indiana, Oregon and Massachusetts, and several feet longer and broader. One striking peculiarity of the vessel is her "tumble-home" sides, or in-

curved bulwarks, that makes the French warships so different in appearance from those of other navies. The old Constitution is one of the few ships that have ever been in the American navy with sides of this design. The object was to give a deflective side to shot and in the lowa the idea carried out is to afford greater rapidity of fire and ease of manipulating the guns in her broadside sponsons. One great military must with an interior spiral stairway lends to two lighting tops, where rapid fire guns are stationed and accommodations provided for a large number of sharpshooters. Her complement of men will be nearly 500, or greater than that of any preceding warship of the new may.

The low a is constructed under the act of July 19, 1892, when provision was made for one "seagoing battleship of about 9,000 tons displacement," to cost, exclusive of armament and speed premit.ms, not more than \$4,600,000. To Secretary Tracy, assisted by his advisers, Chie, Constructor Wilson and Engineerne-Chief George W. Melville, were left the details. Comparing the lowa and the Indiana, the difference between their dimensions may be appreciated by the accompanying measurements:

Indiana, Iowa. Length on load water inc 218 feet 250 feet 10 feet 11 feet 12 feet 11 feet 12 feet 11

The hull will be of steel, with a double bottom and close, watertight subdivision of about ten feet above the water line. The vessel will have one military most, with fighting tops, but will carry no sail. The water line region of the hull is to be protected by a side belt of 14 inches of maximum thickness, with a main depth of 71/2 feet. The transverse armor at the ends of the belt will be not less than 12 inches in thickness, with a main depth of 71/2 feet. for the 12-inch guns will have armor not less than 15 inches thick. The ship's sides, from the armor belt to the main deck, will be protected by steel armor five irches thick, and coal is to be earried back of this five-inch casemate armor. An armored deck, not less than three inches thick, is to extend forward and aft from the ends of the armor belt. and over the side armor belt this steel deck will be 234 inches thick.

A conning tower, not less than ten inches thick, will have an armored communication tube not less than seven mehes thick extending to the armor deck, and affording protection to speakng tubes, bell wires, etc.

The ship's battery is to consist of the following curs: Four 12-inch, eight someh, and six 4-inch breech-loading rifles; twenty 6-pounders, four 1-pounders, four Gatlings, ai d'one held gun.

Briefly, then, the Jowa, compared with the Indiana, has greater length. reater beam, more than 1,000 tons additional displacement, accessed length of outer-belt line and greater coal endurance and speed, together with the ability to work the forward 12-inch guns in almost any condition of sea.

There will be six torredo tabes, one bow, one stern and two on each broadside, one forward and one abait the beam.

The propelling engines will be rights and lefts, placed in water-tight compartments and separated by a middl ~ line bulkhead. These engines will be of the vertical, inverted cylinder, directneting, triple-expansion type, each with a high-pressure cylinder 39 inches, an intermediate-pressure cylinder 55 inches and a tow-pressure eylinder 85 inches in diameter, the stroke of all pistons heing 48 inches. The collective indiated horse power of propelling, air purpseand circulating pump engines willight 11,000 when the main engines are making about 112.5 revolutions per minute. How Some People Follow Every New Fad.

SOMETHING NEW.

But the Majority Prefer That Experiments Should Be Tried Upon Semebody Else

Some persons are always so anxious

for something new that it is astonish-

ing they still continue to eat plain

bread and butter. They have always

thrived well on beef, eggs, and pota-

toes; but somebody writes an article

for a scientific journal, and attempts

to show that these foods are neither

as cheap nor as nutritious as some

other kind of food. Therefore, some

take up whatever some young scientist

directs. We cannot understand this.

When anything has been thoroughly

tried and tested, and found in every way

sati factory, why do some people per-

sist in running after some new-fangled

notion? Take cod-liver oil for in-

stance. It has been used for two

hundred years with most marvellous

success, and in a large variety of

complaints. Its success has been no

greater in the past than it is to-day.

More skillful methods of preparing it,

and emulsifying it (for it is generally

acknowledged that it should always be

given in the form of an emulsion),

gives assurance that its future use is

bound to be even far greater than

And yet some people talk about a "substitute for cod-liver oil"! Sub-

stitute? Why, it is almost laugha-

ble. It certainly would be so, were

the question not such a serious one.

There can be no substitute for cod-

liver oil, for there is nothing at all like

it known to medical science. When

Scott's Emuision of Cod-liver Oil with

the Hypophosphites has been used for

over twenty years, and when thou-

sands have testified to its curative

proporties, is it not strange that any

one would think of trying an experi-

ment with some new preparation of

cod-liver oil? When you know you are

safe in taking Scott's Emulsion, is it

not too risky business to try something new? Do you think Scott's Emulsion

could have stood these twenty years,

and have a larger sale to-day than ever

before, unless it had true, genuine merit.

Where do you suppose these substi-

tutes, which do not contain a particle

of oil, will be twenty years from now?

And where will all the fancy prepara-

tions, as the various wines of cod-liver

oil, be at that time? It is perfectly

safe to predict that before they are

half as old as Scott's Emulsion is, they

will be forgotten. Do not allow your-

selves to be experimented upon; be

satisfied with the best; and take ad-

vantage of twenty years of ever in-

How to be Handsome,

It is a mistake to suppose that the only way to be good looking is to be born so. Good health has more to do with good looks than anything else. AN UNUSUALLY LARGE ATTENDANCE OF TEAGHERS.

The Work of the institute Well Under wfay-Commissioner Clark's Address-Prof. Hendrick's Talk on Opening Exercises and Recesses - A Lesson in Drawing by was Hines-This Morning's Exercises.

The institute was called together at 2 o'clock, yesterday a termoon, by the conductor, Professor Hendrick, The exercises were opened by singing the song entitled, "Sing Alway," which was followed by reading of the 19th Psalm, in which the members of the institute took part. The devotional exercises were ended by repeating the Lord's prayer and singing the national hymn.

School Commissioner Clark spoke of the standing of former institutes, that they were noted for their good attendance, and he asked the teachers to make as good a snowing this year as in former ones.

Prof. Hendrick, tue conductor, spake of the advantages that would result from Institutes if teachers made the most of the opportunities afforded them by the State. He cited the great progress that had been boog ent lo eno sa goiwarb ni ebam results of institute work.

Prof. Hendrick then spike of opening exercises, saying that the teacher who can give a bright, general open ing exercise is a good teacher. He related his own experience, on his first day as a teacher, when he sought to copy the opening exercises of a friend, which had gone off well. The result was a dismal failure and elicited the whispered comment from a small boy on the back seat: "I guess he con't know much abou

teaching." Original ty and adapta bility are necessary in order to make opening exercises interesting. School should be opened with singing and devotional exercises should be held when possible. Devotional exercises are not compulsory and i, there is objection to them, devotion to our country may be taught and if that is not advisable it may be well to substitute devotion to some one in the "deestrick."

Prof. Hendrick said that though at one time opposed to recesses he nai learned better and now favored them and plenty of them. They give opportunity for fresh air an 1 exercise. Simple gymaastics anould be jatro duced for pupils who more about the buildleg.

After a recess of fifteen minu'es "The O k Oaken Bucket" was sunz with enthusiasm and then Miss old Citizens' Birthdays-Conductor Ma-Florence B Himes, special instructor in drawing was introduced. Miss Elmes was here two years ago and she was given a welcome hearty ilog a benefibelg evad of dance tician.

Miss Himes referred to some remarks of Prof. Headrick about the ladies taking off their bats, saying that she had a rule of her own which was to call upon all those wearing their hats to answer ner questious.

As most of the teachers of this in stitute are not over anxious to answer questions of this kind a westera cyclone could not usve removed the hats with any more celerity,

After a few questions as to the place drawing should have in school work, Mis Himes said it should be used in teaching Arithmetic, Physic, Geography and Paysiology. To use it in illustration beath of ordinations the individuality of the scholars. Miss Homes then illustrated several stories on the blackboard and it was easy to see how interesting this exer cise might be made.

Institute theu adjourned until

THIS MORNING'S EXERCI ES.

This morning, after interesting opening exercises, the conductor gave two lessons in the proper method of teaching addition and Miss Himes one in drawing.

This atternoon Miss Himes continued her instruction in drawing and the conductor spoke on 'Madness to Our Method."

Bestures Cannot be Cured

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure Deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for oir-

-Not in many years has there been so much winter weather of the zero kind during the month of March as there was this year.

-A few days ago I was surprised to see a cat running across a field uttering loud yells of distress. 1 finally discovered that the cat's fool was fast in a steel trap, which it had carried away with it, and which had probably been intended for a groundhog or muskrat.

-Although the sun crossed the equinoctial line on the 20 h of March it does not seem to convey much heat to warm tais climate. The frigid northerly winds so much of the time blowing from the ice and snow bound regions of the north, chill the air and keep winter still 'itagering in the lap of spring.''

-Our respected townsman, Gideon W. Cock continues to gain but yers alowly in health. It is hopeful as the warm weather arrives he will get better of his efficting complaint ticdoloureux. Ever since last fall he has been confined steadily to his room and has patiently endured great suffering.

-Che ries and plums should be grafted early before the buds begin to swell. Graft the scions on a warm day. Ap. les and pears can be graft ed a mouth later. Prepare the wax and do the work with a determinetion to rrow good fruit and generations to come will bless you.

- Many anticipate the hired mar on the farm next fall will have in his pocket more clean ready money and can show up more shekels together with good wearing apparel than two thirds of the hard working milk producers can if they do their utmost.

-There bappens to be some conso lation afforded the milk producing farmers in this section. The cost of ground feed is in the market five dollars per ton less than a year of more ago. However, as the milkscrew has received another downward turn within a few days of a quarter of a cent per quart less in price it only serves to make the milk sellers hip droop down quite perceptibly.
